台灣 Low-, mid-, high-elevation IBAs in Taiwan

There are nine IBAs distributed in mid- and high-elevation, and nine in low- and mid-elevation areas, which totally account for 91% of all IBAs. Of all sites, 87.8% of the land area is protected by law. Basically these sites are in national parks and nature reserves in the Central Mountain area. These sites correspond with COA's latest announcement on the Central Mountain Ecological Corridor.

台灣 Wetlands IBAs in Taiwan

There are 28 IBAs distributed in wetlands, estuaries, riverbanks, and reservoirs, with a total area of 49,606 ha, which accounts for 7.6% of the area of all IBAs. They are mainly distributed on Taiwan's west coast, and only 7% of the area is protected. These areas are facing severe threats by all kinds of economic development, especially the establishment of industrial zones.
